

KOM VANDERMADEN ADVISORY GROUP

ETF TACTICAL TOTAL OPPORTUNITY PORTFOLIO

March 31, 2024

Investment objective

The portfolio seeks to achieve long-term capital appreciation while defending against major downturns, by strategically investing in the strongest areas across a full menu of ETF choices, including stocks, bonds, commodities, currencies and cash.

Investment profile

- Seeking a proactive, client-aligned, risk-controlled process to manage wealth across the total available opportunity set through changing market conditions.
- Have a long-term investment horizon.

Investment strategy

- Tactically allocate capital to those areas showing relative strength, avoiding/exiting areas showing relative weakness.
- A disciplined, evidence-based technical process that invests in the stronger areas of the global business cycle using efficient, innovative ETF's.
- The portfolio often holds between 5 and 10 ETF's, traded on either the Canadian or U.S. exchanges.
- The portfolio can hold up to 50% in cash.

The composite includes open fee-paying discretionary managed accounts where the strategy has been held for at least two months, through a purchase or a switch from another investment or a different CIBC Wood Gundy Advisor Managed Account (AMA) strategy. Also included in the composite are closed accounts that held the Strategy, up to the last full month the Strategy was held.

The composite includes AMA performance data, two months after the Strategy's inception in the AMA program. Composite performance returns are geometrically linked and calculated by weighting each account's monthly performance, including changes in securities' values, and accrued income (i.e. dividends and interest), against its market value at the beginning of each month, as represented by the market value at the opening of the first business day of each month. Performance returns are gross of AMA investment management fees, and other expenses, if any. Each individual account's performance returns will be reduced by these fees and expenses.

Individual AMA performance results may materially differ from those in this document due to the above and other factors such as an account's size, the length of time an AMA strategy has been held, cash flows in and out of the individual account, trade execution timing, market conditions and movements, trading prices, foreign exchange rates, specific client constraints, and constraints against purchasing securities of related and connected issuers to CIBC Wood Gundy.

Past performance may not be repeated and is not indicative of future results. This document is prepared for informational purposes only and is subject to change without notice.

This document is not to be construed as an offer to sell, or solicitation for, or an offer to buy any AMA strategy or other securities. Consideration of individual circumstances and current events is critical to sound investment planning. All investments carry a certain degree of risk. It is important to review objectives, risk tolerance, liquidity needs, tax consequences and any other considerations before choosing an AMA strategy.
